

DIY BUCKET HAT

1. Select your bucket hat base.
2. Pick your patches and/or create your own design using the Cricut.
3. Use towel to support/flatten the canvas. Then iron the canvas to remove all moisture and wrinkles.
4. Place design as desired then place parchment paper on top of design.
5. Iron on the design for about 30 seconds. Try to press in place (don't move back & forth like typical ironing). Flip hat over and repeat from the backside.
6. Let cool, slowly remove clear sheet, enjoy!
